

The True Cost of a Cavity

It pays to get regular preventive dental treatment. Left unchecked, a small cavity can cost you thousands of dollars down the road.

The lifetime cost of treating a decayed tooth can be considerable.¹

Lifetime costs: \$6,160

Even with insurance, the lifetime costs of a cavity could be thousands of dollars.²

Stop decay before it starts

- ▶ Visit your dentist at least twice a year for cleanings and exams.
- ▶ Brush and floss regularly.
- ▶ Avoid all forms of tobacco.
- ▶ Drink fluoridated water.

¹These cost estimates are for illustrative purposes only and were based on national average submitted fees [FAIR Health].

²Out-of-pocket expenses will depend on your plan design and coverage.

Northeast Delta Dental is the region's most trusted name in dental insurance for companies of all sizes, individuals, and families in Maine, New Hampshire, and Vermont.
